## Best Manager Waste: **BRONZE** Islamia English School, Abu Dhabi

A school that has always worked very hard for this project with their heartfelt commitment, the students from Islamia School learnt a lot from the evaluation committee's school visit last year.

Their waste audit was done methodically with a well-organized data collection process which was supplemented with awareness activities within the school through assembly presentations, the sports day, board displays, circulars and a survey with over 600 individuals within the school including students, staff and administration.

The School sent **5026 kg** of material for recycling mainly paper, plastic and cartons. An additional **40 kg's** of cans were also sent for recycling from the school. The school provided the team with the certificates from the recycling company that had collected all the above waste. They had also reduced their paper waste generation by **1409Kg** from last year.
