Most Proactive School: Community Outreach **BRONZE** Mariam Bint Sultan School, Al Ain

The Mariam Bint Sultan realized that Eco Clubs played an important role in generating awareness to bring about a change. They also understood that Eco Clubs has a responsibility towards educating their community and enabling them to make a difference.

Realizing this school adopted 88 families in their community. The Eco Club members divided the families amongst themselves and educated the families about sustainable lifestyles and advised them on how to reduce the electricity consumption in their homes by switching off their lights, unplugging gadgets from the sockets when not in use and using energy efficient light bulbs. They also advised the families to reduce their water consumption at homes.

They implemented this campaign in the school internally and helped reduce their water and energy consumption from their campaign with the families was a huge success as the families showed a reduction in their water and electricity consumption. Their Project was a classic example of the Eco Club's External Project as they were able to follow a systematic approach that had an objective, a target which resulted in an outcome (more than 850 people) from the awareness created.
