## Most Proactive School: Outdoor Field Education **GOLD** Al Bashair Private School, Abu Dhabi

The Al Bashair Private School aims to take each of their students out on a field trip to experience nature.

Their vision entails showing their children the various aspects of Nature; they explored the fun side of nature with their Kindergarten students, while the Primary school students learned a bit more by a visit to a plant nursery and the Eco Future Exhibition at The Manarat Al Saadiyat.

Their intermediate students learnt about the production cycle of food while their senior students went on a field trip to the mangroves where they learned about the Mangrove Ecosystem and also did a clean-up there collecting all the debris and plastic bags left behind.

The senior students also visited the Jebel Hafeet Mountains where they got a Geology lesson about rock formation on top of the mountain itself!
