Most Proactive School: Outdoor Field Education SILVER Al Talee'a School - Al Ain

The Al Talea School ensured that all their students have been taken out on Two Field Trips at least during the school year. 400 students from this school were taken out twice through 31 field trips. Their students were taken to places such as nearby farms, the Al Ain Zoo, The Al Ain Municipality Nursery, and Natural Geology Museum at Al Ain University.

The trips are also integrated into their biology, Islamic studies, and science and social science subjects; from the kg level to the secondary level.
